LIST OF ABBREVIATIONS USED IN THE TEXT AND BIBLIOGRAPHY	13
PREFACE (Simon Keay)	15
1. INTRODUCTION	17
1.1. Aims of the research project	18
1.2. Justification of the research project	
1.3. Research approach and data sources	19
1.4. The implications of the study	20
2. STUDIES OF ROMAN FOOD SUPPLY	21
2.1. The <i>Annona</i>	22
2.2. The <i>Annona</i> in the Late Roman Empire	25
2.3. Textual approaches to economic studies	27
2.4. The “Cambridge School”	28
2.5. The “Carandinian Position”	29
2.6. Urban spaces and model cities	31
2.7. The current state of economic studies	33
3. ARCHAEOLOGICAL EVIDENCE FOR TRADE/EXCHANGE	35
3.1. Foodstuffs, proxies and containers	
3.2. Archaeological evidence for the <i>Annona</i> in the Late Empire	38
3.3. Archaeological epigraphic evidence for the state oil supply from the Ilôt de l’Amirauté, Carthage	39
3.4. Shipping and long distance transport	43
3.5. Storage/processing facilities	45
4. ARCHAEOLOGICAL BACKGROUND TO LATE IMPERIAL ROME	47
4.1. Understanding the city	
4.2. Topographic background	48
4.3. Studies of the archaeology of Rome	50
4.4. Understanding the Late Antique city	55
4.5. Relevant issues	61
5. CERAMIC MATERIALS IN THE ARCHAEOLOGICAL RECORD	69
5.1. Studying ceramics in the archaeological record	
5.2. Statistical approaches to data	
5.3. Ceramic quantification	71
5.4. Waste deposits	72

6. A METHODOLOGY FOR STUDYING WASTE	75
6.1. Amphorae as a proxy indicator of trade	
6.2. Studying amphorae in ceramic assemblages	76
6.3. Data acquisition strategy	78
6.4. The archaeological perspective	79
6.5. Understanding the depositional context	80
6.6. Reconstructing distribution systems from patterns of waste disposal	81
6.7. Comparing assemblages	83
6.8. GIS modelling of spatial relationships	
6.9. Generalising urban building densities	85
6.10. Defining access-cost values	88
7. DATA - ROME	91
7.1. Selection of the primary data-set	
7.2. Schola Praeconum	93
7.3. Crypta Balbi	97
7.4. Palatine East	104
7.5. Atrium Vestae	107
7.6. Via di Sant'Alberto Magno	110
7.7. Domus Tiberiana	112
7.8. Bastione Farnesiano	115
7.9. Foro Romano – Area NW	118
7.10. Tempio della Magna Mater	122
7.11. Monte Testaccio	124
7.12. San Sisto Vecchio	127
7.13. Vigna Barberini	129
8. INTERPRETING THE DATA	133
8.1. Explanation of the interpretative approach	
8.2. Quantified data and the ideal interpretative approach	139
8.3. Accessibility as a determinant of deposit location	145
8.4. Proximity as a determinant of deposit location	154
8.5. An integrated interpretation	158
9. CONCLUSIONS	161
9.1. Justifying the methodology: studying ceramic assemblages and the depositional context	
9.2. Implications for the movement of goods around the Late Antique city	162
9.3. Implications for the re-use of urban spaces in Late Antiquity	163
APPENDIX A: TYPOLOGICAL PROVENANCE OF AMPHORAE	165
APPENDIX B: ILLUSTRATIONS OF COMMON IMPERIAL AND LATE ANTIQUE AMPHORA TYPES	173
APPENDIX C: AQUEDUCT FIGURES	183
APPENDIX D: QUANTIFIED DATA	187
